Ian Langkammer Batista

Senior Software Engineer & Architect

+55 33 99842-9751 | ianlgnk@gmail.com | Portfolio | github.com/ianlgnk | linkedin.com/in/ianlgnk

Belo Horizonte, Brazil · Open to remote roles (UTC-3)

SUMMARY

Senior Software Engineer and Architect with 5+ years of experience building mobile, web and embedded-POS products end to end — from architecture and code to deployment and monitoring. Led the transformation of a self-service app to run natively on payment POS terminals (8+ device models, two acquirers), significantly increasing sales and cutting product delivery cost. Independently built and operate Avance Trainer, a SaaS for personal trainers live on the App Store and Google Play (5.0★). Strong in React Native, TypeScript and Node.js, with native Kotlin, Java and Swift experience. Writing code since age 15. Based in Brazil (UTC-3), with full overlap with US Eastern business hours.

PROFESSIONAL EXPERIENCE

Beerpass Club — Florianópolis, Brazil · Remote

Self-service draft beer ecosystem: POS self-service apps, consumer mobile app, digital menu, back-office platform for venues and in-venue displays with rankings and marketing tools.

beerpassclub.com · App Store · Google Play

Senior Software Engineer & Architect — *Jan 2026 – Present*

- Own the architecture of the Beerpass ecosystem: POS self-service apps, consumer mobile app, digital menu, back-office platform and in-venue display system
- Led the adaptation of the self-service app to run on payment POS terminals: **8+ device models across two acquirers (Stone and PagBank)**, significantly increasing sales and reducing total product delivery cost (app, hardware and tap-control firmware)
- Drive technical decisions on stability, performance and product evolution, always tied to business impact
- Promoted from Mid-level to Senior in recognition of architecture ownership and delivery

Tech: React Native, TypeScript, Kotlin, Java, Node.js, Firebase, Expo/EAS

Software Engineer & Architect — *May 2023 – Jan 2026*

- Single-handedly redesigned and developed the consumer mobile app, **reducing rage clicks by 20%+** and improving performance and satisfaction across the user base
- Integrated payment acquirer SDKs and device-specific APIs to enable fully self-service purchases on POS hardware
- Built features across the back-office platform used by venues to manage operations and sales
- Monitored app usage and user behavior with Google Analytics to guide product decisions

Tech: React Native, React, TypeScript, Node.js, Firebase, Kotlin, Swift

Saúde Agora — Belo Horizonte, Brazil · Remote

All-in-one management platform for clinics and hospitals: scheduling, inventory, operations, staff, patients and workflows.

Software Engineer — *Oct 2022 – Apr 2023*

- Developed full-stack features covering scheduling, inventory, patient records and operational workflows
- Built and maintained REST APIs in Java with Hibernate and PostgreSQL; developed front-end features with Vue.js and vanilla JavaScript
- Handled sensitive healthcare data in an agile, fully remote team; promoted from Junior within one year

Tech: Java, Hibernate, PostgreSQL, Vue.js, JavaScript

Junior Software Engineer — *Oct 2021 – Sep 2022*

- Developed back-end endpoints in Java with Hibernate and PostgreSQL and front-end screens with Vue.js and vanilla JavaScript for a healthcare management platform

Visão Tecnologia e Sistemas — João Monlevade, Brazil · Remote

Web Developer — *Jun 2021 – Oct 2021*

- Built and maintained web applications for clients in a fully remote setup

INDEPENDENT PROJECTS

Avance Trainer Founder & Sole Developer *May 2026 – Present*

Coaching platform for personal trainers and their clients (also for self-coached users): iOS and Android apps plus a web dashboard.

avancetrainer.com · App Store · Google Play

- Designed, built and operate the entire product alone: workouts, physical assessments, nutrition, engagement (streaks, weekly feedback) and recurring billing
- Mobile app in React Native 0.86 + Expo SDK 57 (Expo Router, NativeWind), with iOS Live Activities, Dynamic Island and widgets; trainer dashboard in React 19 + Vite with an SSR landing page
- AI features with Gemini 2.5 Flash via Firebase AI Logic to import workout sheets and generate training and meal plans
- Firebase backend (Auth, Firestore, Storage, Cloud Functions v2, App Check); subscriptions, charges and Pix via Asaas; monitoring with Sentry and Crashlytics
- One-push CI/CD: a push to main ships the web app, Cloud Functions and OTA app updates via EAS; **~2,500 commits across 3 repositories**
- **5.0★ on both stores** (8 reviews on the App Store, 21 on Google Play) and 50+ downloads on Google Play since launch

Pedro Porto Studios Store Freelance · Sole Developer *Pre-launch*

Print-on-demand clothing store (t-shirts and baby tees) for designer Pedro Porto.

shop.pedroportodesign.online · pedroportodesign.online

- Building the full store alone: React 19 + Vite + TypeScript front-end and Firebase backend (Google Auth, Firestore, Storage, App Check with reCAPTCHA Enterprise, Cloud Functions on Node 24)
- Mercado Pago checkout (card via Secure Fields and Pix) with OAuth-connected seller account and automatic platform commission; shipping via Melhor Envio; CI/CD with GitHub Actions and automated tests for Firestore rules and functions
- Also rebuilt the designer's portfolio site in code, migrating it from Framer to React + Vite + Tailwind on Firebase Hosting

OTHER PROJECTS

Offline Facial Recognition Check-in System

Freelance · Martial arts academy, Belo Horizonte

Built a gym management system including a Python API running on an Android tablet via Termux to perform facial recognition fully on-device and offline, with no cloud dependency or recurring cost.

- Undergraduate Thesis – E-commerce platform for an independent clothing brand · *2024–2025 · UFOP*

EDUCATION

B.Sc. in Information Systems *May 2020 – Mar 2025*

Federal University of Ouro Preto (UFOP)

Technical Degree in Web Development (Integrated with High School) *Jan 2017 – Dec 2019*

Federal Institute of Northern Minas Gerais (IFNMG)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Kotlin, Swift, Python

Mobile: React Native, Expo/EAS (Build, Submit, OTA Updates), Expo Router, NativeWind, Native Modules, Android, iOS (Live Activities, widgets), POS terminal integration

Front-end: React, Vue.js, Angular, Vite, Tailwind CSS, shadcn/ui

Back-end & Data: Node.js, Java (Hibernate), PostgreSQL, Firebase (Firestore, Cloud Functions, Auth, App Check), Docker, AWS

AI & Payments: Gemini via Firebase AI Logic, Asaas, Mercado Pago, Pix, Stone and PagBank POS SDKs

Tools & Practices: Git, GitHub Actions (CI/CD), GitLab, Jira, Figma, Sentry, Crashlytics, Cloudflare, Google Analytics, Microsoft Clarity, Software Architecture, Clean Architecture, Agile/Scrum

LANGUAGES

English – Professional working proficiency (Cambridge B2 Certificate, 2020)
